Highland Park to Conduct Mosquito Ground Spraying

September 15, 2016 (Highland Park, Texas) – The Town of Highland Park Parks Department and Dallas County Health and Human Services monitors several mosquito traps within the town limits. Mosquito samples from each trap are tested on a weekly basis for: 1) total number of adult mosquitoes in each trap; and 2) the presence of West Nile Virus (WNV). This week the mosquito traps had the following results: 1) Positive mosquito sample for WNV on the west side of town; and 2) the total number of mosquitoes in a County trap on the east side of town were found to be above the treatable threshold as established by the Town’s Mosquito Control Policy. The Parks Department will conduct ground spraying measures on both the west and east sides of town to reduce the density of adult mosquito populations. The Town’s decision to use adulticide is based on the Centers for Disease Control’s recommendations that surveillance data, when combined with established thresholds, indicates a necessity to reduce the density of adult mosquito populations quickly to lower the risk of WNV. The following is the mosquito ground spraying schedule:

- West side of Highland Park (Preston Rd. west to Town limits): Thursday, September 15th, Friday, September 16th, and Saturday, September 17th.
- East side of Highland Park (Preston Rd. east to Town limits): Thursday, September 15th.

Weather permitting, ground spraying will begin at 10:00 p.m. and conclude by 5:00 a.m. In the event of rain or wind speeds in excess of 10 m.p.h., the spraying will be rescheduled. Highland Park residents should remain inside and protect pets during the time the sprayers are in your area. Any pet water dishes left outside should be cleaned after spraying.

Individuals are encouraged to survey their yard for any areas with standing water, such as flower pot basins, bird baths and pet dishes. Shrubbery and landscaping near the foundation tend to harbor mosquitoes during the day due to the cool, moist environment. Mosquitoes are known to be most active in the dawn and dusk periods of the day. The use of insect repellent is recommended, and follow manufacturer’s directions. Commercial products for yard applications are available at local home improvement stores. Mosquito dunks are available at no cost to residents at Town Hall.

Town personnel are available for free home inspections of your yard to identify potential areas of mosquito breeding grounds. Residents may call 214-521-4161 to arrange a free inspection of their property. Website link for additional information – www.hptx.org/MosquitoControl
