**Highland Park to Conduct Mosquito Ground Spraying**

---

**September 21, 2021 (Highland Park, Texas)** – The Town of Highland Park Parks Department and Dallas County Health and Human Services monitors several mosquito traps within the town limits. Mosquito samples from each trap are tested every week for 1) the total number of adult mosquitoes in each trap, and 2) the presence of West Nile Virus (WNV). This week, the mosquito sample from one trap on the East side of Town had the presence of WNV. In response, the Parks Department will conduct three nights of ground spraying measures for the C and D quadrants beginning Wednesday, September 22<sup>nd</sup>. The Town’s decision to use adulticide is based on the Centers for Disease Control’s recommendations that surveillance data, when combined with established thresholds, indicates a necessity to reduce the density of adult mosquito populations quickly to lower the risk of WNV.

- **Wednesday, September 22<sup>nd</sup> through Friday, 24<sup>th</sup>:** Weather permitting, each night mosquito ground spraying will begin at 10:00 p.m. and conclude by 5:00 a.m., East of Preston Road.

Ground spraying measures will include the public rights-of-way and the Town’s tennis courts. We will monitor the weather - rain or wind speeds above 10 m.p.h. will not permit the mosquito ground spraying. Highland Park residents should remain inside and protect pets during the time the sprayers are in your area. Any pet water dishes left outside should be cleaned after spraying.

Mosquitoes are known to be most active in the dawn and dusk periods of the day: wearing long sleeves and pants during these periods is recommended. Follow the manufacturer’s recommendations when using insect repellent. Further, inspect your property for standing water – these locations may unintentionally become breeding grounds for mosquitoes. Commercial products for yard applications are available at local home improvement stores. Mosquito dunks are available at no cost to residents at Town Hall.

Town personnel is available for free home/property inspections to identify potential breeding grounds for mosquitoes. Residents may call 214-521-4161 to arrange a free inspection of their property. Link for information – [www.hptx.org/MosquitoControl](http://www.hptx.org/MosquitoControl)
